

Errors:

- The title is too long and is not very objective. It should be shorter, catchier and maybe include the name of the association.
- The first paragraph should say where the building is located.
- The text is too short and there is lack of information. For instance, it would be important to indicate the estimated dates of the end of the works and of the inauguration and the start of the activities of Casa Europa.
- The use of quotes could also enrich this press release.
- The identification of the author and/or of the association is missing.
